3 AREAS OF EXPERTISE, WITH A SHARED MISSION

To offer the best of technology, quality and  
innovative performance

## OUR IDENTITY

The **neovix BIOSCIENCES** group was founded in 2007, and has been led since its creation by Christian Sarbach. **neovix BIOSCIENCES** seeks to ensure the long-term development of each of its three structures, preserving their identity, skills and 30 years of proven expertise.

Our group brings together a versatile, complementary team of specialists offering real synergy and expertise in various fields: Regulatory Affairs, Marketing, Laboratory, R&D, Quality, IT Solutions, Statistics and Training. At **neovix BIOSCIENCES**, we are united in our love of science and passion for technology and innovation.

We have chosen to put our expertise to use in serving all of your needs, committing to carry out our mission in an ethical, responsible way.

## OUR MISSION

To offer the best of technology, quality and innovative performance :

- By working alongside you to understand your issues and solve them pragmatically
- By offering you customised, tailor-made solutions to suit your needs
- By giving you access to expert, ultra-responsive teams with a proactive, forward-thinking, attentive approach that enables them to work in full independence

Relying on these solid foundations and our impressive pool of skills, we are able to focus on managing your projects, providing you with high-quality services!

## OUR KEY FIGURES

- € • 6 million euros in turnover
- More than 45 committed, loyal employees
- 1500 m<sup>2</sup> of analytical and technical space across 3 geographical sites
- Nearly 300 customers in France and abroad every year

## OUR EXPERTISE

Our three divisions – AR2i, COSMETIC OFFICE and QUALILAB – are home to a large number of experts with multidisciplinary training. They are united in a single goal, and work in synergy to offer a full range of areas of expertise within a very wide variety of activity sectors, across various types of services.

## OUR ACTIVITY SECTORS

- Cosmetics
- Pharmaceuticals
- Biotechnologies
- Health care
- Chemicals
- Food
- Environmental
- Medical devices
- Computing

## OUR AREAS OF EXPERTISE

### REGULATORY AFFAIRS

- Registration dossiers
- Technical/regulatory advice

### LABORATORY

- Analytical development
- Quality control
- Chromatography instrumentation
- Analytical method validation and transfer

### QUALITY

- Advice and Support
- Quality management
- Quality audit
- Qualification and Validation

### R&D

- R&D project support
- Biotechnologies

## NATURE OF OUR SERVICES

- On-site or remote services
- Design
- Support
- Audit
- Research
- Project management
- Support
- Substitution

### IT SOLUTIONS

- IT research, validation and compliance •
- Software solutions •
- Technical and quality audit •

### STATISTICS

- Data analysis •

### MARKETING

- Marketing Consultancy •
- Product development •
- Operational marketing •

### TRAINING

- Tailor-made training •
- Intra- and inter-company training •

## OUR VALUES

We are driven by the strong values encoded in our DNA, and believe it is vitally important to adhere to a corporate philosophy based on a sense of responsibility, commitment and goodwill.

Our group strategy is based on 5 key values which are shared by all our staff.

**PROFESSIONALISM :** "Delivering excellence" is a part of our culture, and is a genuine reflection of the goal pursued by each of our employees. We are committed to exacting professional standards based on thoroughness, pragmatism and expertise.

**TASTE FOR INNOVATION :** Innovation is one of our founding values. It opens up new avenues, and is essential if we are to evolve continuously and remain at the cutting edge of innovative technology.

**ENTREPRENEURIAL PASSION :** The entrepreneurial urge is synonymous with challenge and independence, and also adventure. It is a motivating force for our group, enabling us to rise to challenges and drive its growth.

**GROUP SPIRIT :** This is built on the ambitions shared by all our employees. The collaborative effort between our teams and the group's networks creates a complementary synergy which has a decisive impact on our projects' success. And lastly, within each of our corporate structures, transparency, confidentiality and clarity of information create the dynamic trust which encourages creativity and individual initiatives.

**RESPECT FOR THE INDIVIDUAL :** Each of our employees has a role to play in our group's life and success. That's why one of our priorities is to respect individuals and make their personal fulfilment a priority – a goal reflected in our daily commitment to professional support.

AR2i is a Contract Research Organisation (CRO)-type research and development laboratory. It elaborates chemical analysis methods in the pharmaceutical, parapharmaceutical and cosmetic fields.

AR2i was founded in 1994, and consists of a team of experts (pharmacists, chemists, etc.) from industry, hospitals and universities.

AR2i can support you through a comprehensive approach which will prove the quality of your drug and cover all aspects of your project: from analytical development to marketing authorisations, via routine checks.

## OUR EXPERTISE

AR2i operates in **3 spheres of expertise**, enabling it to provide its customers with a wide range of services.

### LABORATORY DIVISION

- Analytical Development: development of analytical methods, method validation, ICH stability testing, dissolution testing, ICH Q3D testing, etc.
- Quality Control: analysis of raw materials and finished products

### REGULATORY AFFAIRS DIVISION

- Technical/regulatory advice
- Project coordination and monitoring
- Marketing authorisation applications: auditing and drafting
- CTD submissions

### RESEARCH AND DEVELOPMENT DIVISION

- Cosmetic formulation, WPE® process
- Scientific instrumentation
- Study of exhaled breath biomarkers

## OUR ACTIVITY SECTORS

Pharmaceuticals, Chemicals, Cosmetics, Medical devices

## OUR STRENGTHS

- More than 25 years' expertise based on all types of pharmaceutical forms, drug substances and drug products, with more than 100 customers every year
- Team of highly qualified experts (chemical engineers, pharmacists)
- Competence acknowledged by institutional bodies, including GMP approval by France's ANSM, and Research tax credit approval (CIR)
- ANSM-approved pharmaceutical drug control laboratory
- Efficient analytical facility covering over 1,000 m<sup>2</sup>

Founded in 1989, Qualilab is a service provider in the fields of quality management, IT, data analysis and support to analysis and measurement laboratories. Our services improve your processes, support change and help you to manage your risks and performance gains.

## OUR EXPERTISE

QUALILAB can offer **several areas of expertise** :

- Support for your **quality system and strategies**, change management and process optimisation in compliance with regulations and standards (research and implementation, QA substitution, QMS assessment, internal/external audits, selection of CROs and CMOs)
- Delivery of projects related to each stage of the **Information Systems life cycle** (assistance with project management, testing, validation, maintaining in operational condition, change management, IT quality approach, documentation)
- Dissemination of **software solutions** related to the activities of measurement laboratories (analytical validations, stability studies)
- Provision of **analytical support** services (analytical validation and transfer, etc.) and statistical and graphical **results processing**, as well as **R&D project support work** (clinical trials, etc.)
- Running standard or custom **training courses**

## OUR ACTIVITY SECTORS

Cosmetics, Pharmaceuticals, Biotechnologies, Medical devices, Health care, Chemistry, Food, Environment

## OUR STRENGTHS

- 30 years' recognised expertise in our sectors of activity
- Complementary experience, enabling us to provide expert skills in the relevant area of intervention: R&D, Production, Laboratory, Quality, IT and Data Analysis
- Ability to get players "on board" for projects using a specific Qualilab work approach which combines methods, attentiveness, pragmatism, relationships and communication
- Working method based on assessing and improving the current situation and the transfer of knowledge
- Strong familiarity with regulatory authorities' inspection processes and accreditations/certifications (COFRAC, certification bodies, etc.)
- Culture of "data quality and integrity" for a single end goal: "Quality to fit your needs"
